Money Abundant to New York. The New York Tribune of yesterday morn-

The money market is more plentifully supsed in the open market, if any change may noted. Call loans have been made to promment banking houses to-day at 3@31 per cent and the discount figures for desirable paper tile as low as heretofore reported, with a very limited demand. Appearances justify the expectation of continued dullness in money negoallons for some months to come, and even cheaper rates of interest than any hitherto reported. At the present low rate of progress in monetary abundance, we shall soon find capital in New York quoted at about the same figures corrent in England-an approximation to equality which is not inconsistent with the growing importance of New York as one of the great francial centres of the world, though quite un natural when considered in a comparison of the more extensive field offered on this side of the water for the employment of capital.

Pennsylvania Coat Trade.

The statistics of the coal trade for thirty-two Fars show a remarkable increase in the amount and value of the production of coal. At the present time the value of the coal annually mined in this country is nearly equal to the rearly production of gold in California. And t the present rate of increase the coal crops will soon be of greater value. It appears that a 1820, the first year in which coal was mined Pennsylvania, the amount of production was
